Leadership & Management, Issues & Trends

Transcultural Concepts in Nursing Care, 7th Edition

Margaret Andrews & Joyceen Boyle

Transcultural Concepts in Nursing Care helps nursing students transform their thinking so they develop into culturally competent nurses capable of safe, thoughtful, and ethical care of individuals, families, groups, and communities of diverse backgrounds. **Transcultural Concepts in Nursing Care** takes a life span approach to describe cultural variations in lifestyle, habits, beliefs, and life process; and in doing so, provides a framework that will improve health and nursing care to minority, underrepresented, disenfranchised, and marginalized populations. Rather than just covering specific cultures and expected behaviours/beliefs of that culture, the authors provide students the tools they will need as nurses to effectively perform cultural assessments and incorporate their findings into their interventions.

Porth's Pathophysiology, 10th Edition

Tommiw L. Norris & Rupa Lalchandani

The 10th edition of Porth's Pathophysiology: Concepts of Altered Health States continues a legacy of excellence by providing comprehensive, nursing focused coverage designed to help grasp both the physical and psychological aspects of altered health. The book's unique emphasis on "concepts" of altered health states, as opposed to factual descriptions of diseases and disorders, helps students grasp both the physical and psychological aspects of altered health.

Porth's Pathophysiology: Concepts of Altered Health States is designed to make pathophysiology an exciting exploration that relates normal body functioning to the physiologic changes that occur as a result of disease, as well as the body's remarkable ability to compensate for these changes. Indeed, it is these changes that represent the signs and symptoms of disease. Students develop a strong understanding of pathophysiology concepts with the easy to follow narrative that builds concepts on one another, defines words as content is presented, and reviews concepts from physiology, biochemistry, physics, and other sciences along the way.

Motor Behaviour, 2nd Edition

Jeffrey Ives

This updated 2nd Edition of this highly: applied text goes beyond providing the basics of motor control (Unit 1) and motor learning (Unit 2) to helping students understand how these two distinct views interact and ultimately affect outcomes (Unit 3). Taking a functional approach, *Motor Behaviour*, 2nd Edition reflects the most recent research and guidelines from the field and brings topics to life with unique photos and illustrations that show concepts in action. A final chapter offers insights on effective training and practice strategies that connect mind and body for optimal performance.

Foundations of Athletic Training: Prevention, Assessment, and Management, 6th Edition

Marcia Anderson

Foundations of Athletic Training integrates basic medical concepts and related scientific information to provide a strong foundation of general athletic training practices. Using a problem-solving approach to prevention, recognition, assessment, management, and disposition of sports-related injuries and diseases, this text provides athletic trainers and athletic training students with the most extensive, challenging content in a user-friendly format.

SPORTS AND EXERCISE SCIENCE

Essentials of Exercise Physiology, 5th Edition

William McArdle, Frank Katch and Victor Katch

Essentials of Exercise Physiology offers a compact version of the Seventh Edition of the bestselling *Exercise Physiology: Nutrition, Energy, and Human Performance*, making it ideal for introductory undergraduate courses. As students progress through the text, they'll develop a deep understanding of the interrelationships among energy intake, energy transfer during exercise, and the physiologic systems that support energy transfer. Moreover, they'll discover how to apply what is learnt to enhance exercise training, athletic performance, and health.

Sports and Exercise Nutrition, 5th Edition

William McArdle, Frank Katch and Victor Katch

This edition of McArdle, Katch, and Katch's respected text reflects the most recent, evidence-based information on how nutrition affects exercise and sports performance. Using high quality research to illustrate teaching points, the authors provide detailed yet accessible coverage of the science of exercise nutrition and bioenergetics, along with valuable insights into how the principles work in the real world of physical activity and sports medicine. New content, new research citations, and new case studies throughout help prepare students for a successful career in exercise science.

Exercise Physiology: Energy, Nutrition and Human Performance, 8th Edition

William McArdle, Frank Katch and Victor Katch

Setting the standard for more than 30 years, **Exercise Physiology** has helped more than 350,000 students build a solid foundation in the scientific principles underlying modern exercise physiology. This Eighth Edition is updated with the latest research in the field to give students easy-to-understand, up-to-date coverage of how nutrition, energy transfer, and exercise training affect human performance. Throughout the text, the authors apply exercise physiology principles to practical skills, illustrate how theory comes to life through research, and clarify complex issues and problems.

978-1-4511-9383-1 / 1136 pp / Feb 2014

Exercise Physiology for Health, Fitness, and Performance, 5th Edition

Sharon Plowman and Denise Smith

This engaging and beautifully designed text integrates theoretical and research based basic exercise physiology with real-world application to prepare students for exciting positions in exercise science, fitness, physical education, athletic training, rehabilitation, coaching and/or allied health professions.

The 5th Edition offers coverage of foundational science and critical exercise physiology topics. Organized by independent units (Metabolic, Cardiovascular-respiratory, Neuromuscular-skeletal, and Neuroendocrine-immune) this text offers maximum teaching flexibility for faculty and consistent presentation of material for the student.
