About JCO Global Oncology

JCO Global Oncology is an online only, fully open-access journal, published in a continuous publication model such that articles are published online as soon as they are ready. One hand-distributed print issue is produced each year, which includes only the top downloaded articles from the past year.

JCO Global Oncology focuses on cancer care, research, and care delivery issues unique to countries and settings with limited healthcare resources. This peer-reviewed journal features high-quality original research and other articles with the primary focus on the unique challenges of cancer care and research in low- and middle-income countries, filling a great need in the global oncology community. An estimated 66% of cancer deaths occur in low- and middle-income countries, and this is predicted to increase to 70% by the year 2030.

JCO Global Oncology gives authors the opportunity to have their research widely read and disseminated through ASCO's vast promotional and content network, including news media coverage. The journal welcomes articles written by ASCO members and non-members alike and encourages authors from all regions of the world to submit.

HTML5 BEST PRACTICE NOTES

Provide inline CSS and use HTML to deliver initial display resources as much as possible.

- Limit initial dependencies on any render-blocking .js or .css
- Load interactive elements as a deferred or secondary subload, but keep them efficient using techniques such as caching.
- Defer heavy file weights until user initiates interaction.
- Use techniques such as byte-serving to download partial content and to optimize for auto-play video.
- Avoid any unnecessary downloads.
- Combine all supporting files (e.g. JavaScript toolkits, libraries, HTML, and CSS) whenever possible.
- Ads must not load more than 15 supporting files, including any agency supplied tracking scripts.
- Use well-distributed, cached libraries to provide supporting files instead of providing them with the ad.
- Check device and bandwidth and tailor supporting files and other elements to the environment and experience.

We cannot honor viewability related campaign goals if ads are supplied that do not meet the specifications supplied in the grid above.

IVT-related campaign requirements cannot be honored if logs including IP addresses and timestamps are not supplied of suspected IVT-generated impressions for verification.
